## Create • Refresh • Restore in a few easy steps!

### 1 Paint

Apply Chalked paint to the surface with a high quality paint brush. Chalked paint has exceptional coverage and requires only 1 coat. Up to 3 coats can be added for desired look.

### 2 Distress (optional)

Chalked paint can be distressed by rubbing fine to medium sand paper or sanding sponge to the corners and edges. This will give a custom vintage look.

### 3 Topcoat

Instead of applying a hard to use wax, apply 1-2 coats of our Matte Topcoat. This will add durability and protection to your surface.

### Glaze (optional)

Applying a decorative glaze adds a custom antiqued finish to your surface. Apply using long brush strokes in the direction of the wood grain. Use a lint free cloth to remove any excess glaze until you achieve the desired look. The longer you leave the glaze before wiping, the darker the finish will be.
